---

Engineer with enthusiasm for the programming world and artificial intelligence. Quick learning rate and intermediate knowledge about programming languages, especially Python. Team worker willing to learn new things and improve both his professional skills and his software products.

---

## PROFESSIONAL SKILLS

- Teamwork
  - Programming knowledge in Python
  - Responsibility
  - Communication skills
  - Perseverance
  - Problem solving
  - Tolerance
- 

## EXPERIENCE

I don't have any work experience at this moment. I have been studying different programming courses and working on personal projects related to various programming areas. At the same time, I have been developed soft skills such as time management and a quick learning rate, in addition to having a good attitude and motivation.

---
